

JL ADVANCED: for a sport performed with style, comfort and technicality

We want fabric to be number one and Jersey Lomellina knows how! The forward thinking Italian company, in fact, has for many years, been the leading manufacturer of the high tech elasticised knitted jersey fabrics and with the world of sport becoming more demanding, Jersey Limonellina is ready to provide concrete answers through its innovative and functional products. To ensure that style is not forgotten, even during physical activity, and in order to provide perfect harmony between the influence of fashion and the needs of athletes, Jersey Lomellina has created techno-fabrics for the **JL ADVANCED** family: **Piquet**, **Smoothly** and **Cube**. With these items, available for the first time in circular knitting, the precious quality of the new **T400®** fibre by **Invista** marries the innovative technologies of Jersey Lomellina.

Easy to wash and totally effortless to care for, **Piquet**, **Smoothly** and **Cube** dry quickly helping to keep the body temperature and humidity under control leaving the skin naturally fresh. They are capable of guaranteeing an optimum maintenance of both shape and form allowing complete freedom of movement whilst still providing high levels of comfort even under extreme conditions.

The **JL ADVANCED** fabrics favour high performance sports guaranteeing full comfort for the athlete during every performance. Perfect clothing for numerous sporting applications, **Piquet**, **Smoothly** and **Cube**, guarantee: exceptional softness and a high resistance to chlorine and UV rays (UPF 50+), excellent breathability, optimum comfort and a perfect fit.

Piquet

Composition: 66% Polyester 34% ElastereI-P Weight: 150 g/m2

Smoothly

Composition: 60% Polyester 40% ElastereI-P Weight: 180 g/m2

Cube

Composition: 48% Polyester 52% ElastereI-P Weight: 200 g/m2
