CELEBRATING FEMININITY

**Vertigo** by Jersey Lomellina is the ideal fabric for the production of stylish swimwear that can make you look sensuous and glamorous both on the beach and at the swimming pool. Vertigo's appeal will be your partner all through summer making you shine like a star!

Pilling and abrasions resistant, **Vertigo** is also UV protective (UPF 50+) and, thanks to the presence of Xtra Life LYCRA® it is highly chlorine proof, and definitely more sun creams and oil resistant than standard fabrics. Its graphic, modern and innovative design mixes with a high technological content to give life to this extremely versatile fabric by Jersey Lomellina, perfect for water and under the most elegant dresses. Its extreme stretch and extraordinary shape retention power (even after many washes), make it ideal for the creation of shapewear that can sculpt and model even the most curvaceous silhouettes without making you feel constrained. That's why **Vertigo** has been awarded the prestigious LYCRA® Beauty di Invista certificate: this program has been designed for cutting-edge shapewear that can offer comfort, style, quality and glamour.

## Composition:

74% Polyamide - 26% Elastane
